

CORRR... IT'S GREAT!

I KNOW WHAT YOU'RE
THINKING SOIL PIPE
IS SOIL PIPE RIGHT?

*Well not anymore...
Hunter's 110mm soil
pipe has just got better
thanks to its new ~~corrr~~
core!*

Hunter

HUNTERPLASTICS.CO.UK

CO-EX SOIL PIPE

It's great because we've changed how we make it.

Don't worry, you're not compromising on quality at all.

The new pipe has...

- A higher gloss finish
- A tougher 'skin' to help protect against weathering
- And contains a minimum of 30% recycled material

(that's why it looks a bit different inside) ←

*So in fact you're being a
bit of a super hero
really and helping
to save the planet,
one pipe at a time!*

**AVAILABLE IN GREY AND BLACK 110mm,
AT NO EXTRA COST OVER STANDARD PIPE...**

SEE, WE TOLD YOU IT'S GREAT!

Pssst.. Want to sound like you know what you're talking about? In a nutshell, Co-Extrusion (or Co-Ex to people in the know) means that the pipe is made up of 2 layers, an inner recycled layer and an outer 'skin'.

JOBS A GOOD'UN™
